Optimize your processes and structures sustainably.

4

Build up the trust of your customers.

„Having a longstanding experience in the certification of management systems, services and products we support our customers and are at their side as a competent partner.“

Tino Gurschke / Managing director

Certification DIN EN ISO 9001

A certification pursuant to DIN EN ISO 9001 is possible for both, companies and organizations from all areas. The quality management standard is an internationally accepted standard and builds trust in the quality and performance of your products and services worldwide.

This standard will enhance continuous improvement of the performance of your company as well as satisfy your customers.

Preconditions

Certification pursuant to DIN EN ISO 9001 requires a defined structure and organization of the company as well as a clear definition of the responsibilities and tasks in the organizational areas. Essential processes and procedures must be kept by the company as a documented information.

The process
